

Adobe After Effects Fundamentals Training

Introduction to After Effects Training

- Overview of the main features of After Effects
- Introduction to the workspace: tools, menus, and panels
- Creating and opening a new project
- Organizing the Project panel
- Saving and managing the project

Managing Keyframes

- Adding and deleting keyframes for animation
- Adding markers to synchronize sound and animation
- Exploring the Motion Sketch panel to refine movements

Text Animations

- Creating point text and paragraph text
- Transforming text using layer properties
- Applying preset animations to text
- Animating text via inheritance and paths
- Adding text effects: shadows, blurs, etc.
- Previewing animations through Adobe Bridge

Editing Effects

- Using multiple layers and adjustment layers
- Exploring the Effects and Presets panel
- Moving, sliding, and splitting layers
- Creating fades and transitions
- Modifying durations and adjusting layer extensions

Shape Animations

- Using the Pen tool to create shapes
- Animating shapes: twist, zigzag, rounded corners
- Transforming and connecting paths
- Converting text into vector shapes in After Effects

At the end of the After Effects training, you will be able to:

- master the fundamental concepts of professional video editing
- understand the principles of animation, master editing tools, and produce your first animated sequences with After Effects
