

# AI: Evolution, Understanding, Application, and Programming

# Module 1: Introduction to Artificial Intelligence

- Overview and Q&A session (1h30)
- Definition and evolution of AI:
  - ∘ Terminology and evolution
  - From early algorithms to neural networks
  - ∘ Deep Learning and Generative AI
  - Weak, General, and Superintelligent AI
  - Examples of applications across sectors
- Factors supporting AI:
  - Algorithmic and heuristic structures
  - ∘ Hardware aspects (CPU, GPU, TPU)
  - ∘ Languages (R, Python, C++, Rust, Mojo)
  - Software and frameworks
- Introduction to Machine Learning:
  - ∘ Main model categories
  - Supervised and unsupervised learning
  - Applications and use cases
- Introduction to Deep Learning:
  - Differences from Machine Learning
  - Concepts and models
  - Applications and use cases
- Natural Language Processing features
- Overview of Generative AI:
  - Language, image, and multimodal models
  - Market applications and products
  - Example: Google Gemini
- Issues and risks:
  - ∘ Ethics and bias
  - Privacy and environmental impact
  - ∘ Risk of dystopian outcomes

### Module 2: AI Demonstration

- Overview and Q&A session (1h30)
- DevOps and AI pipelines:
  - ∘ Data preprocessing
  - ∘ Training and optimization
  - Deployment
- Machine Learning in practice:
  - ∘ Demo with Scikit-Learn
  - User-friendly approach with PyCaret

- ∘ Note: Source code via Google Colab
- Deep Learning in practice:
  - ∘ Demo with Numpy
  - Using PyTorch
  - ∘ Note: Source code via Google Colab
- Generative AI:
  - Exploring large language and multimodal models
  - Fine-tuning and autonomous agents
  - Note: Hands-on in the next module with Google Gemini

## Module 3: Using Google Gemini

- Hands-on experimentation with Google Colab (3h30)
- Using the chatbox:
  - Crafting simple prompts
  - Tips for Python and other technical prompts
- Using the Python API:
  - Designing advanced prompts
  - Code optimization and unit testing
- Using Gemini Studio:
  - Fine-tuning and Retrieval-Augmented Generation
  - ∘ Building an autonomous agent
  - Experimental projects with Python and more

# Follow-up training with OpenAI

OpenAI Training for Developers
