Photoshop and Artificial Intelligence: Next-Gen Creative Tools

Introduction to the Training: Artificial Intelligence in Adobe Photoshop

Dive into Photoshop's most innovative features with this training focused on the integration of artificial intelligence. Optimize your production workflow and push the boundaries of your creative vision.

Mastering Selection Tools in Photoshop

- Make accurate selections tailored to different image types
- Efficiently save and reuse selections
- Integrate selections into a professional workflow
- **Practical workshop:** targeted selection exercises for greater precision

Understanding and Using Masks in Photoshop

- Discover layer masks, vector masks, and clipping masks
- Perform non-destructive edits with layer masks
- Use vector masks for complex compositions
- **Practical workshop:** create a complete composition using masks

Removing Objects Using Artificial Intelligence

- Erase unwanted elements with Content-Aware Fill
- Use AI-powered tools for clean and automatic removals
- **Practical workshop:** full image retouching using AI

Creating with Artificial Intelligence in Photoshop

- Use Generative Fill to generate original visual content
- Replace or edit backgrounds with the help of AI
- Expand images beyond their original frame with Generative Expand
- **Practical workshop:** build a complete AI-assisted visual project
